OEM Printer Cartridge vs. Refilled Cartridges

Bianca Guimaraes Barros Leal Santos

This analysis was prepared by the User Support Team for the Production Department of a book publishing company.

Why This Topic Matters

- Production uses many printers every day
- OEM cartridges are expensive
- Some employees believe refilled cartridges could save money
- Support team must consider reliability and problems

What Is an OEM Cartridge?

- Made by the printer manufacturer
- Designed specifically for the printer
- Very reliable
- Usually more expensive

What Is a Refilled Cartridge?

- Used OEM cartridge that is cleaned and refilled
- Sold by third-party companies
- Lower cost
- Quality depends on the supplier

Cost Comparison (Example Printer)

- Example printer: HP OfficeJet Pro 6978
- OEM HP cartridge: higher price
- Refilled cartridge: about 30–50% cheaper
- OEM: higher page yield
- Refilled: may require more frequent replacement

Factors Other Than Cost

- Print quality
- Page yield (how long cartridges last)
- Printer reliability
- Warranty coverage
- Environmental impact

Pros and Cons of OEM Cartridges

✅ Pros

- ✨ Best print quality
- 🤝 Most reliable
- 🛡️ Covered by manufacturer warranty

⛔ Cons

- 💵 Higher cost
- ♻️ More new materials used

Pros and Cons of Refilled Cartridges

✅ Pros

- 💵 Lower cost
- ♻️ Less waste

⛔ Cons

- ✨ Inconsistent print quality
- ⏳ Shorter lifespan
- ⚠️ Risk of leaks or printer damage
- 🛡️ Possible warranty issues

Manufacturer Policies

- Many manufacturers recommend using only OEM cartridges
- Firmware updates may block refilled cartridges
- Warning messages may appear
- Damage may not be covered by warranty

Impact on the Support Team

- More printer-related problems
- Harder troubleshooting
- More time spent on printer tickets
- Increased downtime for users

Impact on the Production Department

- Printing delays
- More reprints
- Missed deadlines
- Employee frustration

Recommendation

- Use OEM cartridges for critical printers
- Test refilled cartridges before switching
- Use trusted suppliers only
- Keep OEM cartridges as backup

Case Study Questions

- What are the cost differences between OEM and refilled cartridges?
- What factors other than cost should be considered?
- Do manufacturers discourage refilled cartridges? How?
- How does this choice affect the support team?
